## Chapter Topic Page

1. **THE INDUSTRIAL PLANT OPERATOR**
   - Ken Kerri
   - Dan Campbell
   - 1

2. **FIXED GROWTH PROCESSES (TRICKLING FILTERS AND ROTATING BIOLOGICAL CONTACTORS)**
   - John R. Harrison
   - 25

3. **ACTIVATED SLUDGE PROCESS CONTROL**
   - Ross Gudgel
   - Larry Peterson
   - 121

4. **SEQUENCING BATCH REACTORS**
   - John Brady
   - 247

5. **ENHANCED BIOLOGICAL CONTROL**
   - John G. M. Gonzales
   - Ross Gudgel
   - 287

6. **ANAEROBIC TREATMENT**
   - Ken Kessler
   - David Wade
   - Jill Jordan
   - 349

7. **RESIDUAL SOLIDS MANAGEMENT**
   - Liberato D. Tortorici
   - Boris L. Pastushenko
   - 425

8. **MAINTENANCE**
   - Norman Farnum
   - Stan Watson
   - John Brady
   - Roger Peterson
   - Revised by Malcolm Carpenter and Rick Arbour
   - 597

### Appendix

- **COMPREHENSIVE REVIEW QUESTIONS AND SUGGESTED ANSWERS**
  - 741

- **INDUSTRIAL WASTE WORDS**
  - 765

- **SUBJECT INDEX**
  - 813
SUBJECT INDEX

A
Abnormal operation
anaerobic treatment, 405
rotating biological contactors, 84
Acetogenesis, 359, 360
Acids, 195
Actinomycetes, 190
Activated biofilter, 90
Activated sludge process
aeration, 142–154
air distribution, 151, 164
air filters, 146, 148, 163
air headers, 146, 151, 155, 164
Al West method, 193
amoeboids, 191, 192, 193
biological treatment of industrial wastes, 195–206
blowers, 146, 150, 151, 152, 163
brewery wastewaters, 217–228
brush rotor, 145
bulking, 169
ciliates, 191, 192, 193
complete mix, 160, 162, 169
contact stabilization, 154, 160
control of WAS (waste activated sludge), 173
conventional, 173, 176
dairy wastes, 232–240
denitrification, 168
description, 139
diffused aeration, 146, 147
diffusers, 147, 154, 157, 158, 159, 164
denitrification respiration, 185
extended aeration
F/M (food/microorganism) control, 176
intermittent cycle extended aeration system (ICEAS), 270–279
return activated sludge (RAS) control, 166
F/M (food/microorganism) ratio, 173, 175, 214
filamentous organisms, 142, 190–193, 205, 221, 226, 227
flagellates, 191, 192, 193
foam control, 210, 226
food processing wastes, 228–230
food/microorganism (F/M) ratio, 173, 175, 214
high rate, 173, 176
industrial waste treatment, 195–206
load ratio, 189
MCRT (mean cell residence time), 173, 177, 191
MLVSS (mixed liquor volatile suspended solids) control, 173,
mean cell residence time (MCRT), 173, 177, 191
mechanical aeration, 142–146
microbiology, 190–193
microorganisms, 190–193
microscopic examination, 190–193
mixed liquor volatile suspended solids (MLVSS) control, 173,
180
nitrification, 166, 177
nutrients, 197, 210
operating guidelines, 166–193
organic matter stabilization test, 189
oxygen uptake rate, 181, 186–190
petroleum refinery wastes, 230–232
pH control, 210
pin floc, 192, 193
process control options, 166
protozoa, 190–193
pulp and paper mill wastes, 209–217
pure oxygen, 146
respiration rate, 181–186
return activated sludge, 166–172
rotifers, 190–193
SVI (sludge volume index), 171
sludge volume index (SVI), 171
settleability, 170
settleability approach for RAS (return activated sludge), 169
sludge age, 173, 174
sludge volume index (SVI), 171
start-up, 203
step-feed aeration, 159, 161, 166
straggler floc, 191, 192
surface aerators, 165
temperature effect, 177
treatment of industrial wastes, 195–206
troubleshooting, 169, 172, 175, 214
turbine aerators, 146
volatilized solids inventory, 179
volatile, 151
waste activated sludge, 172–193
West, Al, method, 193
"Y" wall, 153
Acute health effect, 14
Aerated lagoon, 236
Aeration, 142–146
Aeration equipment, 90
Index 815

Analog readout, 649
Anoxic, 186, 300, 330, 331
Aquatic vegetation, uses of water, need to treat, 15
Arch, chemical, 313
Artichoke wastewater, 228
Ash, incinerator, 551, 572
Aspirator, 454
Attached growth, anaerobic, 362, 363, 365, 366, 369
Autogenous burn, 558
Autotrophic, 105
Auxiliary equipment
  instrumentation, RBC (rotating biological contactor), 73
  triddling filter, 47
Axial flow pumps, 617, 624

B

BOD (biochemical oxygen demand), 16, 198
Baffle, scum removal equipment, gravity thickening, 444–446
Baffles, RBC (rotating biological contactor), 65, 67
Ball valves, 693, 696
Bardenpho process, 330–332
Basket centrifuge, 461, 462, 468, 472
Bearings
  electric motor, 699

Beds, sludge, 525, 528
Belt drives, pump maintenance, 701, 703, 704
Belt filter press
  belt speed, 516, 517
  belt tension, 514
  belt type, blinding, 516, 517
cake, 516, 517
  cleaning of belt, 516, 517
  conditioning, 514
description, 513
  drawing, 515
  factors affecting performance, 514
  guidelines, operating, 514
  hydraulic loading, 516, 517
  operation, 516
  performance, 517, 518
  plans and specifications, 575, 576
  polymer dosage, 514, 517
  pressure, 514
  sludge type, 514, 517
  solids recovery, 517
  troubleshooting, 517
  variables, 514
  washing out, 516, 517
Boussay, 210, 359
Biochemical oxygen demand (BOD), 16, 198
Biodegradable, 195
Biobuffer/activated sludge, combined processes, fixed and suspended growth, 35
Biogas, 375, 377, 400, 418
Biological buildup and stabilization, intermittent cycle extended aeration system (ICEAS), 273
Biological contamination, 14, 15
Biological nitrogen removal
  alkalinity and pH, 317, 334–336
  basic principles, 315
denitrification, 315, 316, 322–327
dissolved oxygen, 318
equipment, 316
  fixed film reactor, 322
  methanol, 322, 324, 327
  nitrification, 315–320
  nitrogen levels, 318
  nitrogenous food, 318
  operation, 316–319, 322
  pH, 317
  review of plans and specifications, 344
  suspended growth reactors, 316, 322, 325
temperature, 318
  troubleshooting, 320, 326

Biological phosphorus removal
  lime slaking mechanism, 312
  lime–slurry and mixing, 313
  luxury uptake of phosphorus, 303–314
  maintenance, 312–313
  operation, 309–312
  Phostrip process, 303–314
  reactions, 335

Anaerobic treatment (continued)
  process, 359
  process control, 380
  pumping, troubleshooting, 409
  reactor loading, troubleshooting, 408
  reactor solids, troubleshooting, 409
  recycle, effluent, 387
  restart, 417
  safety, 418
  separator, 375, 376
  shutdown, 417
  "silo" anaerobic filter, 369
  solids wasting, 386
  start-up procedures, 391
  struvite, 418
  suspended growth, 362, 363, 364
temperature control, troubleshooting, 410
temperature extremes, 406
total Kjeldahl nitrogen, 402
toxic substances, 407
toxicity, troubleshooting, 415
troubleshooting, 405–416
types, 361, 362
UASB (upflow anaerobic sludge blanket) systems, 367, 368, 371–379
upflow anaerobic filter, 365
upflow anaerobic sludge blanket (UASB) systems, 367, 368, 371–379
volatile acid to alkalinity ratio, 385
volatile acids, 382, 397
Analog readout, 649
Aerobic treatment (continued)
  BOD (biochemical oxygen demand), 16, 198
816 Treatment Plants

Biological treatment of industrial wastes, 195–206

extended aeration, 173, 176
F/M (food/microorganism) control, 173
high rate, 173, 176
industrial waste, 172–193, 205
MCRT (mean cell residence time) control, 173
MLVSS (mixed liquor volatile solids) control, 173
methods of wasting, 173
microscopic examination, 190–193
mixed liquor, 173
sludge age control, 173
troubleshooting, 173
Waste reduction, dairy wastes, 240
Wastes
biological, 15
chemical, 15
coke, 21
dairy, 16
dissolved, 12
fermentation, 18
fruit, 18
fulling, 20
industrial, 12
inorganic, 15
meat packing, 17
metal finishing, 21
need to treat, 12, 16
oxygen-consuming, 15
petroleum, 20
pulp and paper, 16
reasons for treatment, 12, 16
suspended, 12
tannery, 16
textile, 20
uses of water, 12, 16
vegetable, 18
Wastewater
agricultural, 561, 568, 569, 571
definition, 7
effluent, 11
pumps, 611, 617
Washing, sludge, sequencing batch reactors (SBRs), 259, 266
Water Environment Federation (WEF), 560
Water hammer, 693
Water level controls, 633, 698
Water quality protector, 8
Water, uses of, need to treat
aquatic vegetation, 15
body-contact recreation, 15
fish, 15
non-body-contact recreation, 15
pollution, 9
receiving, 8
uses by industry, 12, 13
wildlife, 15
Watts, 649
Wearing rings, pump, 615, 619, 640, 642, 691
Weirs, flowmeters, 725, 726, 728
West, Al, method, activated sludge process, 193
Wet oxidation
air, 504, 505
detention time, 505
factors affecting performance, 505
feed sludge, 504, 505
guidelines, operation, 507
odor control, 505, 506, 507
operation, 507
performance, 507
pressures, 504, 505
schematic, 506
temperatures, 504, 505
troubleshooting, 504, 507
variables, 505
Wet well pumps, 617, 622, 625, 641, 642
Wet wells, 641, 642

Wildlife, uses of water, need to treat, 15
Windrow composting, 532, 535
