Table of Contents

1.7.1.2 Screening 41
1.7.1.3 Sedimentation 43
1.7.1.4 Flotation 46
1.7.1.5 Filtration 47
1.7.1.6 Evaporation 51
1.7.1.7 Distillation 52
1.7.1.8 Adsorption 54
1.7.1.9 Stripping 55
1.7.1.10 Other Physical Processes 57

1.7.2 Chemical Treatment 60
1.7.2.1 Neutralization 61
1.7.2.2 Precipitation 62
1.7.2.3 Ion Exchange 63
1.7.2.4 Oxidation and Reduction 65
1.7.2.5 Dechlorination 66

1.7.3 Biological Treatment 66
1.7.3.1 Stabilization Ponds 67
1.7.3.2 Aerated Lagoons 67
1.7.3.3 Activated Sludge 67
1.7.3.4 Trickling Filters 68
1.7.3.5 Anaerobic Digestion 68

1.7.4 Land Treatment 68

1.7.5 Thermal Treatment 69
1.7.5.1 Liquid Injection 69
1.7.5.2 Rotary Kilns 70
1.7.5.3 Fluidized Beds 70
1.7.5.4 Other Thermal Technologies 70

1.7.6 Sludge Treatment 71
1.7.6.1 Sludge Thickening 72
1.7.6.2 Digestion 72
1.7.6.3 Conditioning 72
1.7.6.4 Dewatering and Drying 73
1.7.6.5 Incineration and Wet Oxidation 73
1.7.6.6 Stabilization and Solidification 73
1.7.6.7 Disposal 73

1.8 Fats, Oils, and Grease Reduction 74
1.8.1 Grease Traps and Interceptors 75
1.8.1.1 Bioremediation and Bioaugmentation 78
1.8.1.2 Maintenance Best Practices 79

1.9 Dental Amalgam Discharge Prevention 82
1.9.1 Dental Amalgam Rule 83
1.9.1.1 Pretreatment Standards 84
1.9.1.2 Reporting and Recordkeeping Requirements 85

1.9.2 Dental Separators 86

1.10 Basic Math for Inspectors 87
1.10.1 Significant Figures 87
1.10.2 Velocity and Flow Rate 88
1.10.3 Force and Pressure 92
1.10.4 Work, Head, and Power 97
1.10.5 Detention Time 101
1.10.6 Concentration and Loading Rate 103
1.10.6.1 Concentration 103
1.10.6.2 Loading Rate 104
1.10.7 Dilution and Mixing 105
1.10.7.1 Dilution Ratio and Factor 105
1.10.7.2 Concentration 106

Table of Contents

3.3.7.4 Steelmaking 215
3.3.7.5 Vacuum Degassing 215
3.3.7.6 Continuous Casting 216
3.3.7.7 Hot Forming 216
3.3.7.8 Salt Bath Descaling 216
3.3.7.9 Acid Pickling 216
3.3.7.10 Cold Forming 216
3.3.7.11 Alkaline Cleaning 217
3.3.7.12 Hot Coating 217
3.3.7.13 Process Waste Characteristics 217

3.3.8 Inorganic Chemical Industries 218
  3.3.8.1 Chlor-Alkali 220
  3.3.8.2 Hydrofluoric Acid 223
  3.3.8.3 Titanium Dioxide 225
  3.3.8.4 Aluminum Fluoride 227

3.3.9 Chrome Pigments Industry 228
  3.3.9.1 Process Waste Characteristics 229
  3.3.9.2 Hydrogen Cyanide 230
  3.3.9.3 Sodium Dichromate 231
  3.3.9.4 Copper Sulfate 233
  3.3.9.5 Nickel Sulfate 234

3.4 Flow Monitoring 236

3.4.1 Open-Channel Flow Measurement 240
  3.4.1.1 Palmer-Bowlus Flumes 244
  3.4.1.2 Parshall Flumes 246
  3.4.1.3 Weirs 252
  3.4.1.4 Instrumentation 265
  3.4.1.5 Checking Open-Channel Flowmeter Accuracy 271

3.4.2 Closed-Pipe Flow-Metering Systems 275
  3.4.2.1 Electromagnetic Flowmeters 276
  3.4.2.2 Turbine Meters and Propeller Meters 276
  3.4.2.3 Ultrasonic Meters 277
  3.4.2.4 Pitot Tube Meters 278
  3.4.2.5 Differential Pressure Systems 278
  3.4.2.6 Velocity Modified Flowmeters 280

3.4.3 Automatic Sampler Flow-Proportioned Pacing 280

3.4.4 Approximate Measurement 282

Chapter Review 289
4.3.2.4 Petroleum Refineries 341
4.3.2.5 Pulp and Paper Industry 348
4.3.2.6 Chemical Manufacturing 350
4.3.2.7 Food and Dairy Products Processing 354
4.3.2.8 Rendering 361
4.3.2.9 Treatment Alternatives 368

4.4 Other Industries and Small Businesses 369

4.5 Centralized Waste Treatment Facilities 373

4.6 Report Writing 377

4.6.1 Routine Reports 377
4.6.2 Special Investigation Reports 378
4.6.3 Enforcement Reports 378

4.7 Inspections for Stormwater Compliance 380

4.7.1 Stormwater Runoff and Land Development Impacts 381
4.7.2 Pollutants, Sources, and Effects 383
4.7.3 Stormwater Pollution Prevention Plans 383
4.7.4 Best Management Practices 385
4.7.4.1 Operational Source Control BMPs 387
4.7.4.2 Structural Source Control BMPs 389
4.7.4.3 Treatment BMPs 391
4.7.5 Inspection Activities and Areas 397
4.7.5.1 Dust Control 398
4.7.5.2 Materials Storage and Transfer 399
4.7.5.3 Cleaning and Washing 401
4.7.5.4 Vehicle and Equipment Maintenance 403
4.7.5.5 Chemical Applications 405
4.7.5.6 Roof Vents and Fugitive Emissions 406
4.7.5.7 Concrete and Asphalt Production and Recycling 406
4.7.5.8 Metal Products Manufacturing and Post-Processing 407
4.7.5.9 Painting, Finishing, and Coating 407
4.7.5.10 Wood Treatment and Preservation 407
4.7.5.11 Commercial Composting 408
4.7.6 Inspecting Records 408

4.8 Sampling Procedures for Wastewater 409

4.8.1 Safety Precautions 409
4.8.2 Developing a Sampling Program 410
4.8.2.1 Sample Quantity and Intervals 412
4.8.3 Collected Samples 413
4.8.3.1 Analysis 414
4.8.3.2 Containers 416
4.8.3.3 Preservation 418
4.8.4 Sample Collection 419
4.8.4.1 Obtaining the Sample 419
4.8.4.2 Sampling for Total Toxic Organic Analyses 425
4.8.4.3 Field Tests 426
4.8.4.4 Grab and Composite Samples 427
4.8.4.5 Labeling Samples 427
4.8.4.6 Sample Storage 428
4.8.5 Documentation 429
4.8.5.1 Evidence for Court Actions 429
4.8.5.2 Chain of Custody 430
4.8.5.3 Report Writing 432
4.8.6 Tracing Illegal Discharges 432
4.8.7 Quality Assurance/Quality Control Procedures 435
4.8.7.1 Laboratory Quality Assurance/Quality Control 437

4.9 Math Assignment 439

4.9.1 Pollutant Mass 439
4.9.2 Pollutant Mass Rate 440
4.9.3 Composite Sampling 442
4.9.4 Spill Containment 448
4.9.5 Toxic Waste in Collection Systems 450
4.9.6 Waste Strength Monitoring 454
4.9.7 Collection System-Use Fees 459
4.9.8 Detention Time 465
4.9.9 pH Neutralization 467
4.9.10 pH Adjustment 474
4.9.11 Hydroxide Precipitation 477
4.9.12 Complexed Metal Precipitation 478
4.9.13 Reduction of Hexavalent Chromium 479
4.9.14 Cyanide Destruction 490
4.9.15 Counterflow Rinsing 495
Chapter 5
Pretreatment Program Management  507

5.1 Pollution Control Regulations  508

5.1.1 Environmental Protection Agency  508
   5.1.1.1 Organizational Structure  509
   5.1.1.2 Delegation of Federal Authority  509
   5.1.1.3 Definitions  512

5.2 Pretreatment Program Planning  512

5.2.1 Wastewater Treatment Plant Size and Staffing Needs  513
   5.2.1.1 Technical Capabilities of Pretreatment Managers  513
   5.2.1.2 Resources Required  514
   5.2.1.3 Outside Assistance  517

5.2.2 Industrial Development  517

5.2.3 Enforcement  518

5.2.4 Comparing Programs  519

5.2.5 Industrial Waste Pretreatment Program Approval  520

5.2.6 Funding  521
   5.2.6.1 Revenue Collection  522
   5.2.6.2 Industry Charges  522

5.2.7 Pretreatment Program Elements  527
   5.2.7.1 Discharge Permits  527
   5.2.7.2 Inspection  527
   5.2.7.3 Monitoring Industrial Wastewater Discharges  529
   5.2.7.4 Technical Expertise  530

5.2.8 Pretreatment Program Database  531
   5.2.8.1 Internet  532
   5.2.8.2 Preparing Reports and Industrial Waste Documents  532
   5.2.8.3 Field Records for Industrial Waste Personnel  532
   5.2.8.4 Laboratory Records  532

5.2.9 Professional Ethics  532

5.2.10 Compliance and Enforcement Programs  533

5.2.11 Laboratory Analyses  535

5.2.12 Legal Assistance  535

5.2.13 Pollution Prevention  536

5.3 Industrial Wastewater Discharge Permits  537

5.3.1 Information Required  537

5.3.2 Permit Review Process  538
   5.3.2.1 Individual Conditions  540
   5.3.2.2 Cooperation with Other Governmental Entities  541
   5.3.2.3 Recordkeeping  541

5.3.3 Legal Obligations  542

5.4 Industrial Waste Monitoring  542

5.4.1 Self-Monitoring  543

5.4.2 Monitoring by POTW Personnel  543

5.4.3 Reviewing Analytical Data  544
   5.4.3.1 Analytical Data Comparison  544
   5.4.3.2 Statistical Data Evaluation  545

5.5 Hazardous Waste Rules and Regulations  546

5.5.1 Effects on Pretreatment Programs  546
   5.5.1.1 Superfund Site Cleanup  548

5.5.2 Facilities for Hazardous Wastes  548

5.6 General Pretreatment Regulations  549

5.6.1 Prohibited Discharge Standards  550

5.6.2 Categorical Pretreatment Standards  552
   5.6.2.1 EPA-Regulated Categories  556
   5.6.2.2 EPA Reporting Requirements  558
   5.6.2.3 Modification of Categorical Standards  562
   5.6.2.4 Types of Categorical Standards  564
   5.6.2.5 Types of Wastestreams  566
   5.6.2.6 Total Toxic Organics  566
   5.6.2.7 Electroplating and Metal Finishing Regulations  568

5.6.2.8 Compliance Calculations  571
## 5.7 Wastewater Ordinance 578

### 5.7.1 EPA Minimum Requirements 579
### 5.7.2 Industrial Wastewater Prohibitions 580
#### 5.7.2.1 General Provisions 581
#### 5.7.2.2 Specific Provisions 582
### 5.7.3 Approval Process 582
### 5.7.4 Minimum Pretreatment Program Requirements 584
#### 5.7.4.1 Legal Authority 584
#### 5.7.4.2 Procedures 586
#### 5.7.4.3 Staffing and Funding 588
#### 5.7.4.4 Local Limits 588
#### 5.7.4.5 Enforcement Response 588
#### 5.7.4.6 Significant Industrial User Database 589
### 5.7.5 Pretreatment Program Implementation 589
### 5.7.6 Other Local Ordinances 589
#### 5.7.6.1 Local Collection System Disposal Codes 590
#### 5.7.6.2 Building Codes 590
#### 5.7.6.3 Underground Tank Laws 590
#### 5.7.6.4 Land Use Ordinances 591
#### 5.7.6.5 Hazardous Waste Laws 591
#### 5.7.6.6 Stormwater Regulations 592

## 5.8 Industrial Waste Compliance Programs 592

### 5.8.1 Enforcement Response Plan 593
### 5.8.2 Administrative Compliance Programs 594
#### 5.8.2.1 Administrative Fine Penalties 599
#### 5.8.2.2 Suspension and Revocation of Permits 600
### 5.8.3 Misdemeanor and Felony Criminal Actions 600
### 5.8.4 EPA Guidance on Enforcement 601

## 5.9 Auditing 602

### 5.9.1 Auditor Expertise 603
### 5.9.2 Audit Procedures 604
#### 5.9.2.1 Preparation 605
#### 5.9.2.2 IU Site Visits 605
#### 5.9.2.3 Follow-Up 606
### 5.9.3 Required Resources 606

## 5.10 Public Relations 622

### 5.10.1 Industrial Personnel 623
### 5.10.2 Environmentalists and Politicians 623
### 5.10.3 News Media 624
### 5.10.4 General Public 626
### 5.10.5 Attorneys 626
### 5.10.6 Other POTW Agencies 626
### 5.10.7 Avoiding Philosophical Activism 627

## 5.11 Emergency Response Preparedness 627

### 5.11.1 Planning 627
#### 5.11.1.1 Laws and Regulations 629
#### 5.11.1.2 Notification List 630
### 5.11.2 Maintaining Control of the Incident 632
#### 5.11.2.1 Initial Response 632
#### 5.11.2.2 Identify the Material 633
#### 5.11.2.3 Determine Affected Area 634
### 5.11.3 Typical Emergency Responses 634
#### 5.11.3.1 Notification 634
#### 5.11.3.2 Accidental Spill 634
#### 5.11.3.3 Unknown Material Reported in Collection System 636
### 5.11.4 Limiting Incident Impact 637
#### 5.11.4.1 Removal of Material 637
#### 5.11.4.2 Treatment in the Collection System 638
#### 5.11.4.3 Plant Preparedness 639
#### 5.11.4.4 Enforcement 639
### 5.11.5 Preventing Explosive Conditions 640
#### 5.11.5.1 Fire and Combustion Types and Effects 640
#### 5.11.5.2 Factors Affecting Flammability 642
#### 5.11.5.3 Flammable Materials Discharge Estimation 648
#### 5.11.5.4 Screening for Dangerous Compounds 658
5.11.5.5 Detecting Combustible Gas 658
5.11.5.6 Photoionizer and Organic Vapor Analyzer Characteristics 659
5.11.6 Total Atmospheric Vapor and Gas Concentrations and Protection Level 661
   5.11.6.1 Instrument Sensitivity 662

Chapter Review 664

Answer Key 669
Glossary 671
Index 685
A

Accident reporting rules, 117
Acute exposure, 145
Acute health effect, 145
Adjusted metered water supply table, 524, 525f
Administrative compliance programs, 594–595, 596f–598f, 599
suspension and revocation of permits, 600
Adsorption, 25
Aerobic condition, 67
Aliquots, 280
Alternative mass limit formula, 501–502
Amalgam separators, 83, 83f, 86
Amalgam wastes, mercury-containing, 83
Anaerobic, 9
Anaerobic digestion, 29
Anaerobic ponds, 67
Analog readout, 239
Anodizing, 186
Atmospheres, oxygen-deficient, 134
Atmospheric hazards, 127–129, 296
atmospheric testing results, 135
confined space, 127–129
flammable and explosive gases, 131–134
humidity, 135
oxygen-deficient atmospheres, 134
toxic gases, 130–131
Atmospheric testing, 135
Atomic absorption (AA) spectrophotometers, 414
Auditing, 602–603
auditor expertise, 603–604
audit procedures, 604–605
follow-up, 606
IU site visits, 605–606
preparation, 605
required resources, 606
Auditing, checklist structure, 607, 608f–613f
file review and evaluation, 619
enforcement activities, 621
issuance of IU control mechanism, 619–620
IU compliance status, 621–622
IU identification, 619
POTW application of IU pretreatment standards, 620
POTW compliance monitoring, 620
interview, 614
application of pretreatment standards and requirements, 616
compliance monitoring, 616
control mechanism evaluation, 615
data management and public participation, 617–618
enforcement, 616–617
environmental effectiveness and pollution prevention, 618–619
evaluations and information, 619
IU characterization, 615
legal authority, 615
POTW pretreatment program modification, 614–619
resources, 618
observations and concerns, 622
Auditor expertise, 603–604
Autoignition temperature, 143
Automatic sampler flow-proportioned pacing, 280–281, 281f

B

Backsiphonage, 338
Baseline monitoring report (BMR), 302, 510, 559–560
BAT. See Best available technology (BAT)
Batch process, 314
Battery manufacturing processes and wastewater generation, 198, 200, 201f, 202f
ancillary operations, 203
anodes, 200
cathodes, 200, 203
process waste characteristics, 203, 204f
Bench-scale analysis, 25, 373
Best available technology (BAT), 553
Best management practices (BMPs), 79
inspections for stormwater compliance, 385, 387
operational source control, 387–388
structural source control, 389–390
treatment, 391–396, 391f–396f
Best practicable technology (BPT), 553, 554
Bioaugmentation, 78–79
Biochemical oxygen demand (BOD), 3, 162, 300, 350, 523
Biodegradable, 28, 174, 350
Biological treatment, industrial pretreatment technologies, 66
activated sludge, 67
aerated lagoons, 67
anaerobic digestion, 68
stabilization ponds, 67
trickling filters, 68
Bioremediation, 78–79
Bioretention planters, 391–392
Biosolids, 3
Biphenyls, polychlorinated, 54
Blowdown, 33, 165, 321, 566
BMPs. See Best management practices (BMPs)
BOD. See Biochemical oxygen demand (BOD)
BPT. See Best practicable technology (BPT)
Brine system, 220
Bubbler, 267, 268f
Building codes, 590
Canister-type respirators, 148
Capacitance probes, 269, 271, 271f
Carbon monoxide (CO), 130
Carcinogen, 8, 120, 630
Cardiopulmonary resuscitation (CPR), 117
Catch basin, 368
Categorical Pretreatment Standards, 552–554, 552t–553t
Categorical standards, 181, 318, 509
modification, 562–564
fundamentally different factors, 562–563
net gross calculations, 563
removal credits, 563–564
Caution, 139
Cementation, 60
Centralized waste treatment (CWT) facility, 298, 373–377,
374f–376f, 548
Centrate, 57
Centrifuges, 57
Chain of custody, 303, 581
Cheese manufacturing facility, 356–357, 356f, 357f
Chelating agent, 185, 411
Chemical applications, inspection activities and areas, 405–406
Chemical coating, 185, 186f
Chemical manufacturing, industry-specific inspection procedures,
350, 351f
general manufacturing area, 353
manufacturing process steps, 351
wastewater pretreatment, 351, 352f, 353
wastewater treatment area, 353–354
Chemical oxygen demand (COD), 197, 523
Chemical pulping, 194
Chemical treatment, industrial pretreatment technologies, 60–61
dechlorination, 66
ion exchange, 63–65, 65f
neutralization, 61–62, 61f
oxidation and reduction, 65–66
precipitation, 62–63, 62f, 63f
Chlorine, 130
Chrome pigments industry, manufacturing processes and
wastewater generation, 228–229, 229f
copper sulfate, 233–234, 234f
hydrogen cyanide, 230, 231f
nickel sulfate, 234, 235f, 236
process waste characteristics, 229–230
sodium dichromate, 231, 232f, 233
Chronic exposure, 145
Chronic health effect, 145
Cipolletti weir, 262, 262f
Cleaning and washing, inspection activities and areas, 401
food service areas, 402
outdoor pressure washing, 402–403
tools and equipment, 402
vehicle washing or steam cleaning, 402
Cleanout, 424
Clean Water Act (CWA), 12, 381, 508
Closed-pipe flow-metering systems, flow monitoring, 275
differential pressure systems, 278, 279f
emagnetic flowmeters, 276, 276f
pitot tube meters, 278, 278f
propeller meters, 276, 277f
tube meters, 276, 276f
ultrasonic meters, 277–278, 277f
velocity modified flowmeters (VMFMs), 280
Coalescing plate interceptor (CPI), 396
COD. See Chemical oxygen demand (COD)
Collection system-use fees, math assignment, 459–465
Combined wastestream formula, math assignment, 497–501
Combustible gas monitoring system, 346
Combustible liquid, 143
Commercial composting, inspection activities and areas, 408
Compatible pollutants, 162, 174
Competent person, 135
Complexed metal precipitation, math assignment, 478–479
Compliance, 4, 301
Compliance programs, industrial waste, 592–593
administrative compliance programs, 594–595,
596f–598f, 599
administrative fine penalties, 599
suspension and revocation of permits, 600
enforcement response plan (ERP), 593–594
EPA guidance on enforcement, 600–601
misdemeanor and felony criminal actions, 600–601
Composite sample, 153, 303, 529
math assignment, 442–448
Comprehensive Environmental Response, Compensation, and
Liability Act (CERCLA) of 1980, 546
Concrete and asphalt production and recycling, 406–407
Confined space, 125–126, 295, 528
atmospheric hazards, 127–129
atmospheric testing results, 135
flammable and explosive gases, 131–134
humidity, 135
oxygen-deficient atmospheres, 134
toxic gases, 130–131
class A, 126
class B, 126
class C, 126
classification, 126–127
engulfment, 126
entering, 135–138, 137f, 138f
entry permit, 126
hazardous atmosphere, 127
non-permit, 126
permit-required, 126
Conservative pollutant, 10
Contaminants, 2
Continuous process, 362
Control agency (CA), 529
Conventional industrial pollutants, 300
Conventional pollutants, 3, 300
Cooking grease, storage, 401
Corrosive materials, 140–142
Corrugated plate interceptor (CPI), 46
counterflow rinsing, math assignment, 495–496
CPI. See Coalescing plate interceptor (CPI); Corrugated plate
interceptor (CPI)
Cradle to grave, 312, 546
Crude oil, 210
Crude petroleum, 208, 210
CWT facility. See Centralized waste treatment (CWT) facility
Cyanide
destruction, math assignment, 490–495
oxidation of, 318
D

DAF. See Dissolved air flotation (DAF)
DAFT. See Diffused air flotation treatment (DAFT)
Dairy products processing plant, 360–361
Danger, 139
Decibel, 149
Dental amalgam discharge prevention, 82–83, 83f
dental amalgam rule, 83–84
pretreatment standards, 84–85
reporting and recordkeeping requirements, 85–86
dental separators, 86
Detention basins, 394
Detention time, 101–103
math assignment, 465–467
Dewater, 27
Dialysis, 57
Differential pressure systems, 278, 279f
Diffused air flotation treatment (DAFT), 26
Digital readout, 239
Direct dischargers, 377, 512
Discharge prevention, dental amalgam, 82–83, 83f
dental amalgam rule, 83–84
pretreatment standards, 84–85
reporting and recordkeeping requirements, 85–86
dental separators, 86
Discharger
direct, 377
indirect, 377
Dissolved air flotation (DAF), 46, 347
Documentation, sampling procedures for wastewater, 429
chain-of-custody, 430, 431f
evidence for court actions, 429–430
report writing, 432
Domestic sewage study (DSS), 547
Drag out, 163
Drain inlet inserts, 395
Drip acid, 224
Driving and traffic, 123
traffic control in streets, 124, 124f, 125t
Dry pesticides, storage, 400
DSS. See Domestic sewage study (DSS)
Dust control, 398–399

E

EBCT. See Empty bed contact time (EBCT)
EEBA. See Emergency escape breathing apparatus (EEBA)
Effluent, 4
Electrical hazards, 150, 151f
Electrodialysis, 38, 57
Electroless plating, 185
Electrolytic recovery, 60
Electromagnetic flowmeters, 276, 276f
Electroplating, 185
Electrowinning, 60
Elutriation, 73
Emergency escape breathing apparatus (EEBA), 125
Emergency response preparedness, 627
emergency responses, 634
accidental spill, 634–636
notification, 634
unknown material reported in collection system, 636–637
limiting incident impact, 637
enforcement, 639
plant preparedness, 639
removal of material, 637
treatment in collection system, 638–639
maintaining control of the incident, 632
affected area determination, 634
identify the material, 633–634
initial response, 632–633
planning, 627–629
laws and regulations, 629–630
notification list, 630–632, 631t
preventing explosive conditions, 640
detecting combustible gas, 658–659
factors affecting flammability, 642–648, 644t
fire and combustion types and effects, 640–642
flammable materials discharge estimation, 648–658
photoionizer and organic vapor analyzer characteristics, 659–661
screening for dangerous compounds, 658
total atmospheric vapor and gas concentrations and protection level, 661–662
instrument sensitivity, 662
Empty bed contact time (EBCT), 26
Enforcement reports, 378–380
Enforcement response plan (ERP), 519, 593–594
Entrain, 277
Entry permit, confined space, 126
Environmental Protection Agency (EPA), 2, 508–509
Multi-Sector General Permit (MSGP), 397
EPA. See Environmental Protection Agency (EPA)
EPA reporting requirements, 558–562
baseline monitoring reports (BMR), 559–560
compliance schedule, 560
final compliance report, 560
hazardous waste disposal reporting, 561–562
notification of violations or discharge changes, 561
periodic compliance reports, 560–561
reporting special problems, 561
Erodible materials, storage, 399–400
ERP. See Enforcement response plan (ERP)
Evaporation, non-solar, 52
Explosive gases, 131–134

F

Facultative bacteria, 67
Facultative ponds, 67
Fats, oils, and grease (FOG), 74, 354
reduction, 74–75
bioremediation and bioaugmentation, 78–79
grease traps and interceptors, 75–78, 76f, 77f
maintenance best practices, 79–82
Federal Water Pollution Control Act 1972, 508
Fertilizers, storage, 400
Fire extinguishers, 119f
Fire point, 143
Flammable gases, 131–134
flammable liquids, 143
Flammable materials, solvents and, 142–143
Flammables, discharge of, 169–170
Flash point, 143
Flow metering system, 346
Flowmeters, electromagnetic, 276, 276f
Flow monitoring, 236–240
approximate measurement, 282–288
automatic sampler flow-proportioned pacing, 280–281, 281f
closed-pipe flow-metering systems, 275
differential pressure systems, 278, 279f
electromagnetic flowmeters, 276, 276f
pitot tube meters, 278, 278f
propeller meters, 276, 277f
turbine meters, 276, 276f
ultrasonic meters, 277–278, 277f
velocity modified flowmeters (VMFs), 280
open-channel flow measurement, 240–244, 240t, 241f, 242f
checking open-channel flowmeter accuracy, 271–275, 272f
instrumentation, 265–271, 265f, 266f, 268f
Palmer-Bowlus flumes, 244–246, 244f, 245f
Parshall flumes, 246–252, 246f, 247f, 248t
weirs, 252–265, 253f–255f
FOG. See Fats, oils, and grease (FOG)
Food and dairy products processing, industry-specific inspection procedures, 354
cheese manufacturing facility, 356–357, 356f, 357f
inspecting a dairy products processing plant, 360–361
inspection procedures, 359–360
meat packing and processing facility, 354–356, 355f
vegetable/fruit canning, 357–359, 358f, 359f
Food items, outdoor storage and processing of, 400
Food wastes, storage, 401

G
Gas chromatographs (GCs), 415
Gas detectors, 131
hydrogen sulfide, 129
Gases
flammable and explosive, 131–134
toxic, 130–131
Gasoline, 131
General Pretreatment Regulations, 549–578
Categorical Pretreatment Standards, 552–554, 552t–553t
EPA-regulated categories, 556–558, 557t
EPA reporting requirements, 558–562
categorical standards modification, 562–564
categorical standards types, 564–566, 565t
compliance calculations, 571–577
electroplating and metal finishing regulations, 568–571
electroplating category, 569
industry definitions, 568
metal finishing category, 569, 570t
Prohibited Discharge Standards, 550–551
total toxic organics (TTO), 566, 567t, 568
wastestream types, 566
Gloves, 147
Grab sample, 153, 303, 529
Graphite furnace atomic absorption (GFAA), 414
Grease interceptors, 75–78, 77f
Grease traps, 75–78, 76f
Ground fault circuit interrupters (GFCI), 150

H
Hazard Communication Standard (HCS), 118
Hazardous atmosphere, 127
Hazardous material management plan (HMMP), 123
Hazardous materials, 138–140, 139f
corrosive materials, 140–142
infectious agents, 144–145
poisonous and toxic chemicals, 143–144
protection from, 146–147
respiratory protective equipment, 148–149
solvents and flammable materials, 142–143
Hazardous waste, 2, 138, 312, 541
Hazardous waste laws, 591–592
Hazardous waste rules and regulations, 546
effects on pretreatment programs, 546–548
superclean site cleanup, 548
facilities for hazardous wastes, 548–549
Headworks, 550
Hexavalent chromium, 39
H-flumes, 240t, 263–265, 264f
High-pressure liquid chromatographs (HPLC), 415
Hot dip coating, 185
Humidity, atmospheric hazard, 135
Hydraulic capacity problems, 166
Hydrocyclone, 45, 45f
Hydrogen cyanide (HCN), 130
Hydrogen fluoride generators, 223
Hydrogen sulfide, 131
Hydrogen sulfide gas detectors, 129
Hydroxide precipitation, math assignment, 477–478

I
IAF. See Induced air flotation (IAF)
Immediately dangerous to life or health (IDLH), 126
Indirect discharger, 377
Induced air flotation (IAF), 46
Inductively coupled plasma (ICP) instruments, 414
Industrial inspection, 329–330
industry-specific inspection procedures, 333
chemical manufacturing, 350–354, 351f
conducting the inspection, 334–337
food and dairy products processing, 354–361
inspection preparation, 333–334
job shop electroplating facilities, 337–341
petroleum refineries, 341–347, 345f
pulp and paper industry, 348–350, 349f
rendering, 361–368
treatment alternatives, 362–369
on-site industrial inspection procedures, 330–331, 330t–331t
monitoring activities, 332–333
Industrial pretreatment (waste) inspector. See Pretreatment inspector
Industrial pretreatment technologies, 39
biological treatment, 66
activated sludge, 67
aerated lagoons, 67
anaerobic digestion, 68
stabilization ponds, 67
trickling filters, 68
chemical treatment, 60–61
  dechlorination, 66
  ion exchange, 63–65, 65f
  neutralization, 61–62, 61f
  oxidation and reduction, 65–66
  precipitation, 62–63, 62f, 63f
  land treatment, 68–69
  physical treatment, 40
  adsorption, 54–55, 54f, 55f
  distillation, 52, 53f, 54
  equalization, 40–41
  evaporation, 51–52, 52f, 53f
  filtration, 47, 49f–51f, 51
  flotation, 46–47, 46f, 47f
  physical processes, 57–60, 58f, 59f
  screening, 41–42, 42f
  sedimentation, 43–46, 43f–45f
  stripping, 55, 56f
  sludge treatment, 71–72
    conditioning, 72–73
    dewatering and drying, 73
    digestion, 72
    disposal, 73
    incineration and wet oxidation, 73
    sludge thickening, 72
    stabilization and solidification, 73
  thermal treatment, 69
    fluidized beds, 71
    liquid injection, 69–70
    rotary kilns, 70
  thermal technologies, 70–71
Industrial users (IUs), 294
Industrial waste compliance programs, 592–593
  administrative compliance programs, 594–595, 596f–598f, 599
  administrative fine penalties, 599
  suspension and revocation of permits, 600
  enforcement response plan (ERP), 593–594
  EPA guidance on enforcement, 595–596f
  individual conditions, 594–595
Industrial waste monitoring, 542–545
  monitoring by POTW personnel, 543–544
  reviewing analytical data, 544
  analytical data comparison, 544–545
  statistical data evaluation, 545
  self-monitoring, 543
Industrial waste pretreatment program approval, 520–521
Industrial waste survey, 297, 538
Industrial wastewater, 162–163
  compatible and noncompatible pollutants, 174
  concentrated solutions, 175–176
  continuous and intermittent discharges, 178–180
  dilute solutions, 174–175
  generation and discharge frequency, 177
  discharge during hours of operation, 177–178
  inspector's responsibility, 163–165
  pollutant concentration and mass, 180–182
  types of, 174–182
  utility system discharges, 180, 181f
  effluent and sludge disposal and reuse, 172–173
  treatment plant, 170–171
  hydraulic overload, 171
  influent variability, 171–172
  interference, 171, 173f
  permit review process, 538–540, 539f
  cooperation with other governmental entities, 541
  individual conditions, 540–541
  recordkeeping, 541–542
Industrial wastewaters, effects of, 165
  collection system, 166
  flammables, 169–170
  hydraulic capacity problems, 166
  odors, 167–168
  pH problems, 168–169
  plugging, 166–167
  temperature, 170
  industrial hazardous waste, 171
  industrial waste monitoring, 542–545
  monitoring by POTW personnel, 543–544
  reviewing analytical data, 544
  analytical data comparison, 544–545
  statistical data evaluation, 545
  self-monitoring, 543
  Industrial users (IUs), 294
  Industrial waste compliance programs, 592–593
  administrative compliance programs, 594–595, 596f–598f, 599
  administrative fine penalties, 599
  suspension and revocation of permits, 600
  enforcement response plan (ERP), 593–594

Technology-based standards, 4, 554
Teratogenic substance, 145, 630
Thermal treatment, industrial pretreatment technologies, 69
fluidized beds, 71
liquid injection, 69–70
rotary kilns, 70
thermal technologies, 70–71
Threshold limit value (TLV), 32, 130
Time-weighted average (TWA), 140
TLV. See Threshold limit value (TLV)
Totalizer, 239, 346
Total toxic organics (TTO), 566, 567f, 568
requirements, 145
Toxic, 513
Toxic chemicals, poisonous and, 143–144
Toxic gases, 130–131
Toxicity, 11, 165, 523
Toxic pollutants, 3, 509, 554
priority, 555t
Toxic substance, 2, 3, 120, 295
Toxic Substances Control Act (TSCA) of 1976, 145
Toxic waste in collection systems, math assignment, 450–454
Traffic control in streets, 124, 124f, 125f
Traffic hazards, 296
Trapezoidal (Cipolletti) sharp-crested weir, 262, 262f
Trichloroethylene (TCA), 131
TTO. See Total toxic organics (TTO)
Turbine meters, 276, 276f
TWA. See Time-weighted average (TWA)
U
UEL. See Upper explosive limit (UEL)
Ultrafiltration, 38, 58, 59f
Ultrasonic meter, 268–269, 269f, 270f, 277–278, 277f
Ultraviolet (UV), 149
Ultraviolet-visible spectrophotometers (UV-VIS), 414
Underground tank laws, 590–591
Index

Uplift force, 97
Upper explosive limit (UEL), 127, 640
and lower explosive limit (LEL), 128f
Upper flammable limit (UFL). See Upper explosive limit (UEL)
Urban water cycle, 382f
UV-VIS. See Ultraviolet-visible spectrophotometers (UV-VIS)

V
Vapor cloud explosion (VCE), 641
VCE. See Vapor cloud explosion (VCE)
Vegetable/fruit canning, 357–359
Vegetated swales, 392, 393f
Velocity and flow rate, 88–92, 91f
Velocity modified flowmeters (VMFMs), 280
Venturi meter, 278, 279f
VMFMs. See Velocity modified flowmeters (VMFMs)
V-notch weir, 239f, 252, 253f, 256, 256f
standard discharge formulas for, 256t–257t
Volatile, 163, 410, 637
Volatile solids, 348

W
Warning, 139
Waste, hazardous, 2, 138
Waste strength monitoring, math assignment, 454–459
Wastewater collection system, 2
Wastewater facilities, 579
Wastewater generation, manufacturing processes and, 182
battery manufacturing, 198, 200, 201f, 202f
ancillary operations, 203
anodes, 200
cathodes, 200, 203
process waste characteristics, 203, 204f
chrome pigments industry, 228–229, 229f
copper sulfate, 233–234, 234f
hydrogen cyanide, 230, 231f
nickel sulfate, 234, 235f, 236
process waste characteristics, 229–230
sodium dichromate, 231, 232f, 233
inorganic chemical industries, 218, 220
aluminum fluoride, 227–228, 227f
chlor-alkali, 220–221, 222f, 223
hydrofluoric acid, 223–225
titanium dioxide, 225–227, 226f
iron and steel industry, 213, 214f
acid pickling, 216
alkaline cleaning, 217
coke making, 213
cold forming, 216–217
continuous casting, 216
hot coating, 217
hot forming, 216
ironmaking, 215
process waste characteristics, 217–218, 218t, 219f
salt bath descaling, 216
sintering, 213, 215
steelmaking, 215
vacuum degassing, 215
leather tanning and finishing, 205, 206f
beamhouse processes, 205
finishing processes, 207
process waste characteristics, 207–208, 209f
tanyard processes, 205, 207
metal finishing industries, 183, 184f
anodizing, 186
bright dipping, 186, 187f
cleaning and surface preparation, 183, 185
etching and chemical milling, 186
machining, 183
plating and coating, 185
process waste characteristics, 186–187
wastewater generation, 187–189
petroleum refining industry, 208, 210, 211f
process waste characteristics, 210, 212f
printed circuit board manufacturing, 189–191, 190f
process waste characteristics, 191, 192f
pulp, paper, and paperboard industries, 193, 194f
papermaking, 196
process waste characteristics, 196–198, 198f, 199f
pulping, 193–196
raw material preparation, 193
Wastewater influents, 79
Wastewater ordinance, 302, 527, 578–579
approval process, 582–583
EPA minimum requirements, 579–580
industrial wastewater prohibitions, 580–581
general provisions, 581–582
specific provisions, 582
local ordinances, 589
building codes, 590
hazardous waste laws, 591–592
land use ordinances, 591
local collection system disposal codes, 590
stormwater regulations, 592
underground tank laws, 590–591
minimum pretreatment program requirements, 584
enforcement response, 588
legal authority, 584–586
local limits, 588
procedures, 586–588
significant industrial user database, 589
staffing and funding, 588
pretreatment program implementation, 589
Wastewater, sampling procedures for, 409
collected samples, 413–414
analysis, 414–416
containers, 416, 417t, 418
preservation, 418
documentation, 429
chain-of-custody, 430, 431f
evidence for court actions, 429–430
report writing, 432
quality assurance/quality control (QA/QC) procedures, 435–437
laboratory QA/QC procedures, 437–438
safety precautions, 409–410
sample collection, 419
field tests, 426
grab and composite samples, 427
labeling samples, 427–428
Wastewater, sampling procedures for (continued)
  obtaining a representative sample, 423–425
  obtaining the sample, 419–423
  sample storage, 428–429
  sampling for total toxic organic analyses, 425–426
  sampling program development, 410–412
  hypothetical situation, 410–411
  sample quantity and intervals, 412–413
  tracing illegal discharges, 432–435
Wastewaters, industrial, 162–163
  compatible and noncompatible pollutants, 174
  concentrated solutions, 175–176
  continuous and intermittent discharges, 178–180
  dilute solutions, 174–175
  effects of (see Industrial wastewaters, effects of)
  generation and discharge frequency, 177
  discharge during hours of operation, 177–178
  inspector's responsibility, 163–165
  pollutant concentration and mass, 180–182
  types of, 174–182
  utility system discharges, 180, 181t
Wastewater treatment plant, 2–3
  size and staffing needs, 513
  outside assistance, 517
  resources required, 514–516, 516t–517t
  technical capabilities of pretreatment managers, 513
Water cycle, urban, 382f
Water Quality Act, 12
Weirs, 240t
  Cipolletti, 262, 262f
  rectangular, 258–259, 258f, 259f, 261f
  V-notch, 239f, 252, 253f, 256, 256f
    standard discharge formulas for, 256t–257t
Wood pulp bleaching, 195–196
Wood treatment and preservation, 407–408
Writing, report, 377, 432
  enforcement reports, 378–380
  routine reports, 377–378
  special investigation reports, 378, 379f
